

# MISHAB CP

## FULL STACK DEVELOPER | API DEVELOPER

Dubai, UAE | +971 554531717 | mishabcp01@gmail.com | www.linkedin.com/in/mishab-c-p

### SUMMARY

Full Stack Developer with 2 years of Dubai-based experience on fintech and ERP projects, skilled in PHP, Laravel, CodeIgniter, JavaScript, MySQL, and REST API development. Experienced in backend architecture, API integration, and performance optimization. Proficient in software documentation, client support, and user training across live projects. Adept at troubleshooting, requirement gathering, and delivering reliable solutions under tight deadlines.

### SKILLS

**Web & Backend Development:** PHP, Laravel, CodeIgniter, JavaScript, jQuery, Bootstrap

**API & Database:** REST API integration, Postman, MySQL, phpMyAdmin

**Support & Operations:** Client communication, documentation, troubleshooting, software training, server deployment (cPanel)

### WORK EXPERIENCE

**Full Stack Developer | API Developer**

**May 2024- Present**

Netplex IT Solutions – Kannur, Kerala

- Built and maintained ISL, a Laravel-based laboratory management system with optimized database design and backend structure.
- Designed project documentation and technical structure for multi-module applications.
- Provided software support, client training, and issue resolution for deployed systems.
- Led API development for PlexPay, a UAE-based fintech recharge platform—integrated third-party provider APIs, ensured secure transactions, and managed debugging.
- Collaborated with clients to gather requirements, offer real-time technical support, and ensure smooth system operations.
- Managed deployments through cPanel, optimized backend queries, and improved performance by up to 80%.

### EDUCATION

**SNGCET 2019-2023**

Bachelor of Technology: Computer science  
Payannur, Kannur, Kerala

**Memunda HSS 2017-2019**

Higher Secondary: Computer Science  
Vadakara, Calicut, Kerala

### CERTIFICATES

Full Stack Developer Proficiency Certification

**2023-2024**

### PROJECTS

- Portfolio Website – Built a custom React portfolio with a contact form via Web3Forms API, showcasing personal projects across frontend and full-stack development.
- Restaurant Ordering System – Developed a food ordering platform using Java and Tailwind CSS, with modules for ordering, user sessions, and menu management.
- AlgoViz – Interactive tool in React to visualize sorting (Bubble, Merge, Quick) and searching (Linear, Binary) algorithms for better conceptual understanding.
- Task Organizer – Task manager built with React, focusing on CRUD operations, with progress charts, filtering, and a calendar for due dates.
