Frontend: JavaScript, React, jQuery, Bootstrap, Tailwind CSS, Responsive Design, UI/UX Implementation

Tools: Git, cPanel, Postman, API Testing, Software Testing, Quality Assurance

Development Practices: Full SDLC, System Deployment, Technical Documentation, Client Communication, Requirements Gathering, Performance Optimization

Professional Experience

PHP Full Stack Developer

Netplex IT Solutions

May 2024 – Present

Dubai, UAE

- Developed PlexPay fintech platform using PHP/CodeIgniter backend and React frontend, offering mobile recharges, bill payments, and voucher services with multiple third-party API integrations.
- Built ISL Laboratory Management ERP using Laravel for backend and modern frontend technologies, creating a unified system connecting multiple departments with role-based access control.
- Designed and implemented responsive admin panels and user interfaces for both applications, ensuring optimal user experience across all devices.
- Integrated multiple third-party APIs for payment processing, service delivery, and reporting systems with comprehensive error handling and logging.
- Optimized database performance by 80% through query optimization, indexing strategies, and implementing caching mechanisms.
- Managed complete deployment process including server configuration, database setup, and post-deployment support with technical documentation and client training.

Full Stack Projects

PlexPay Fintech Platform | *PHP, CodeIgniter, React, MySQL, API Integration*

- Full stack development of fintech platform with PHP/CodeIgniter backend, React frontend, and MySQL database for mobile recharges, bill payments, and voucher services.
- Integrated multiple third-party payment and service provider APIs with secure transaction processing and comprehensive error handling.
- Developed responsive admin panel and user interfaces with real-time transaction tracking, reporting dashboards, and user management features.

ISL Laboratory Management System | *Laravel, React, MySQL, Role-Based Access*

- Full stack ERP development using Laravel backend and React frontend for laboratory operations including sample tracking, testing, and reporting modules.
- Implemented role-based access control system with customized interfaces for different user roles and departments.
- Achieved 80% performance improvement through database optimization, efficient query design, and frontend performance enhancements.

Portfolio Website | *React, JavaScript, Web3Forms API, Responsive Design*

- Developed responsive portfolio website with React frontend and API integration for contact form functionality.
- Implemented modern UI/UX design ensuring optimal viewing experience across desktop, tablet, and mobile devices.

Restaurant Ordering System | *Java, Tailwind CSS, Session Management*

- Built food ordering platform with Java backend, responsive frontend, and session-based user authentication.
- Implemented dynamic menu display, cart functionality, and real-time order tracking features.

AlgoViz Algorithm Visualizer | *React, JavaScript, Algorithm Implementation*

- Developed interactive algorithm visualization tool with React frontend for educational purposes.
- Implemented visual representations of sorting and searching algorithms with adjustable speed controls.

Education

Bachelor of Technology in Computer Science <i>SNGCET</i>	2019 – 2023 <i>Payannur, Kannur, Kerala</i>
Higher Secondary Education in Computer Science <i>Memunda HSS</i>	2017 – 2019 <i>Vadakara, Calicut, Kerala</i>

Certifications

Full Stack Developer Certification – 2024
